Portfolio

PROFESSIONAL SUMMARY

A dynamic final-year Informatics Engineering student with solid experience in digital administration and business operational management. Experienced in optimizing front-end administrative systems, financial recapitulation accuracy, and inventory management efficiency. Recognized as a disciplined, communicative individual proficient in independent project management.

WORK & FREELANCE EXPERIENCE

Front End Admin

February 2026 – August 2026

Absolute Padel Club, Tangerang

- Managed front desk operations, including welcoming customers, handling court reservations, and delivering excellent service to ensure customer satisfaction.
- Responsible for precise recording and recapitulation of daily transactions and operational administration.
- Coordinated daily operational communications to ensure effective and efficient workflow on-site.

Professional Resume Strategist & Digital Service

LinkedIn

August 2024 - Present

- Managed communications and consultations professionally with strategic clients from diverse industry backgrounds.
- Responsible for independent project time management to ensure all services were completed on time with 5-star quality.
- Utilized digital copywriting skills to craft persuasive and structured professional narratives.

Finance & Inventory Admin

Pabrik Tahu

December 2021 - February 2022

- Administrative Management: Fully responsible for the precise daily recapitulation of income and expense data.
 - Stock Management: Managed inventory and product stock recording systems to support smooth operations.
 - Logistics & Distribution: Efficiently organized product distribution schedules to various outlets
-

INFORMATICS ENGINEERING PROJECTS (ACADEMIC)

- **Thoracic X-Ray Multilabel Classification (Computer Vision):** Developed a thoracic disease classification system (15 classes) using chest X-ray radiographic images from the NIH ChestX-ray 14 dataset by applying a Deep Learning architecture (DenseNet-GRU).
- **Fake Face Detection (AI & Image Processing):** Built a Convolutional Neural Network (CNN)-based artificial intelligence system to process images and automatically detect facial authenticity with high accuracy.
- **Twitter Data Sentiment Analysis (#IndonesiaGelap):** Conducted comparative research on the performance of 3 classification models for Twitter data sentiment analysis, covering data crawling, preprocessing, and model accuracy evaluation.
- **Credit Card Fraud Classification (Deep Learning):** Built an artificial neural network model using a Multi-Layer Perceptron (MLP) architecture to detect fraudulent transactions; implemented Class Weights strategies to handle highly imbalanced financial datasets.
- **E-Commerce System Development:** Designed web architecture focusing on user experience and data security.
- **Database Optimization (SQL):** Built an efficient database schema for management information system data processing needs.

PENDIDIKAN

Bachelor's Degree in Informatics Engineering| Cendekia Abditama University, Tangerang

August 2022 – 2026 (Expected Graduation)

Active 8th-semester student.

Study Focus: Database Systems, Web Programming, Data Structures, and Management Information Systems.

TECHNICAL SKILLS (HARD SKILLS)

- **IT, Data Analysis & AI:** Data Analysis, Natural Language Processing (NLP), Computer Vision (CNN, DenseNet-GRU), Machine Learning (Classification), Deep Learning (MLP), Imbalanced Data Handling (SMOTE & Class Weights), Database Management (SQL), and System Troubleshooting.
- **Programming & Tools:** Python, Jupyter Notebook.
- **Productivity & Admin:** Microsoft Office (Excel, Word, PowerPoint), Complex Data Processing, Business Reports, Reservation Systems.
- **Digital Branding:** ATS-Optimization, Personal Branding Strategy, and Digital Copywriting.
- **Personal Traits:** Honest, thorough, disciplined, and proficient in independent project time management
